

ORGANIC LAWN FOOD

10-0-1

SAFE AROUND CHILDREN, PETS & THE ENVIRONMENT

Jonathan Green Organic Lawn Food is a complex organic lawn food that promotes grass growth. These homogenous, easy-to-spread granules, can be used on established and newly seeded lawns or when sodding. Use in spring, summer or fall.

The organic approach to lawn care takes time, be patient, since nature needs time to break down nutrients. Children and pets may re-enter lawn area after application.

5,000 sq. ft. #10250

15,000 sq. ft. #10251

EARLY SPRING MARCH • APRIL

- Fertilize to give your lawn a boost after winter
- Apply a pre-emergent to prevent crabgrass

LATE SPRING MAY • JUNE

- Adjust soil pH
- Loosen hard and compacted soil
- Feed soil microbes

SUMMER JULY • AUGUST

- Feed the lawn organically
- Promote deep greening

AUTUMN SEPTEMBER • OCTOBER

- Feed the lawn organically
- Repair summer damage and protect the lawn from harsh winter weather

- A complex, all organic lawn fertilizer that provides excellent turf nutrition for 8 to 10 weeks
- Contains iron for deep greening, great for establishing new seedings
- Eco-friendly formula - no-phosphorus, great for lake and bay communities
